| BERGECOT | F | S1 | S6 |

Cuadro de los alleles Compatibilidad entre las variedades

Para garantizar una buena polinización, las dos variedades plantadas no deben pertenecer al mismo grupo de incompatibilidad. Deben también florecer a la misma época y la polinización por las abejas es necesaria.

Dos variedades son **compatibles** cuando no hay ningún allele comúne como WONDER COT y LILLY COT

Dos variedades son **semi-compatibles** cuando tienen un allele comúne como WONDER COT y MAGIC COT.

Dos variedades **semi-compatibles** pueden polinizarse entre ellas cuando están plantadas en cantidad suficiente, por ejemplo 2 filas de una variedad y 2 filas de la otra.

Dos variedades **no son compatibles** cuando tienen los mismos alleles como WONDER COT y SUNNY COT..
